Subject: JNOS 1.10b and C++ 3.1 386 compile problems
To: packet-radio@ucsd.edu

I have compiled the source for JNOS 1.10b with C++ v3.1 with 80386 processor set in the makefile. The program locks up my 386 and another ham running my compiled version gets qemm386 error messages about an invalid instruction and then his PC locks up. I have compiled the same source with the same compiler for 80186 and experience no problems. Any ideas? Do I have a JNOS problem or a C++ problem?

Thanks in advance.
